Glossary

Materials/Technology

- A** **Airlock**
A rimless (drill mount) eyewear design that utilizes a compression mounting system.
- Bt** **Beta Titanium**
A flexible and lightweight, yet durable titanium alloy which is also hypoallergenic.
- Cu** **Copper Alloy**
A nickel-free, hypoallergenic metal material.
- IPR** **Co Injection Plastic/Rubber**
A two step injection mold process where Nylon and Rubber are used to create various frame parts.
- CZ** **Customized Zyl**
Cellulose Acetate that is customized for a specific collection with the collection logos, trademarks or designs.
- BT FLEX** **Flexon Bridge & Temples**
Bridges and temples made from memory metal, which consists mainly of Nickel, Titanium and other trace elements.
- B FLEX** **Flexon Bridge**
Bridges made from memory metal, which consists mainly of Nickel, Titanium and other trace elements.
- T FLEX** **Flexon Temples**
Temples made from memory metal, which consists mainly of Nickel, Titanium and other trace elements.
- S** **Stainless Steel**
A highly corrosion-resistant material that is made from of an alloy of Chromium and Iron.
- M** **Metal**
Monel is a lightweight, durable and corrosion resistant metal comprised mainly of nickel and copper. Nickel Silver is another commonly used metal comprised of copper, nickel and zinc. Both metals hold their shape well and can be plated or spray coated in a large variety of colors.
- Ti** **Titanium**
A low density, high strength, lightweight material that is hypoallergenic and corrosion resistant.
- F** **Carbon Fiber**
Carbon fiber is an ultra lightweight, flexible material which features high tensile strength, minimal thermal expansion and a distinctive woven pattern.

Injected Plastic

- G** **Grilamid TR-90** (see below)
- P** **Propionate CP** (see below)
- T** **Trogamid TR-55** (see below)
The above are all nylon-based, translucent, ultra-lightweight and hypoallergenic plastic materials that are co-polyamids. These materials are approximately 20% lighter than standard plastics and offer superior comfort, durability and flexibility. Injected plastics should always use a cold insert. Frame adjustments can be made after lens insertion using slight heat, not to exceed 40C/104F.
- M** **Methacrylate**
Used in logo plaques for specific collections.

Plastic

- CZA** **Cellulose Acetate/Zyl**
A flexible plastic material available in a wide array of colors and patterns. Zyl contains organic materials and plasticizers that is manufactured in sheet form (extruded) or pellets (injected). Warm the frame to insert the lenses and to make frame adjustments. Heat should not exceed 71C/160F.

Sunglass Lenses

- CR39** **CR 39 Lens**
Lightweight, scratch-resistant, UV protective plastic lenses.
- MAG** **Mag-Set Polarized**
A patented clip-on technology which utilizes specially placed magnets on the clip-on to lock into hidden magnets in the frame endpieces which join the clip-on and frame together. The clip-on houses polarized lenses that reduce glare, are UV protective and enhance color, definition and depth perception.
- 2W** **Mask 2wing**
A specialized mask/shield that keeps the look of a shield while maintaining separate curvatures for each eye. UV protective.
- NS** **Nylon Shield**
This shield lens is made of an optical quality, nylon material and is UV protective.

- LENS** **Nylon Lens**
This shield lens is made of an optical quality, nylon material and is UV protective.

- P** **Polarized**
Polarized lenses reduce glare created by reflected light while enhancing color contrast, definition and depth perception. Also UV protective.

- LENS** **Polycarbonate Lenses**
These lenses are impact-resistant, lightweight and provide UV protection. Polycarbonate lenses also have a scratch resistant coating.

- LENS** **Toric Lenses/Shield**
Toric lenses/shields that have different curvatures in the horizontal and vertical meridians, enhancing optical clarity and reducing distortion. UV protective.

- ULTRA CLIP** **UltraClip Polarized**
A patented design which uses a special eye wire material on the base frame and magnets housed on the interior of the clip-on to join the front and clip-on together. The clip-on houses polarized lenses that greatly reduce glare, and enhance color, definition and depth perception.

Nose Pads

- APA** **Adjustable Pad Arms**
Nose pad arms that can be adjusted for comfort.
- PC** **PC Nosepads**
Nose pads that are made from Polycarbonate.
- PVC** **PVC Nosepads**
Nose pads that are made from PVC (rigid plastic).
- SN** **Silicone Nosepads**
Nose pads that are made from soft silicone.
- SCREW** **Screw-in Nosepads**
Nose pads that are mounted into the pad box with screws.
- SNAP** **Snap-in Nosepads**
Nose pads that snap into the pad box.

Hinge

- SH** **Flex/Spring Hinge**
A spring loaded hinge which keeps its initial adjustment and balance, thereby significantly reducing the need for subsequent adjustments.
- SH** **Stopper Hinge**
A feature that prevents the temple tip from touching the back side of the lens in order to prevent lens scratching on sunglasses.

Bridge

- ADJ** **Adjustable/Flexible Bridge**
A durable bridge which adds comfort and holds adjustments.
- SB** **Saddle Bridge**
A contoured, fitted bridge.
- UNI** **Unifit Bridge/Universal Bridge**
A one-piece stationary bridge that is contoured to fit the nose.

Other

- Clip-on**
Clip-on available.
- Kids**
- Mens**
- Rx**
Sunglass frame which can be fitted for a prescription lens.
- Teens**
- Tweens/Petite Fit**
- Unisex**
- Womens**
- UV Protective** (all suns)
Protects eyes from harmful UV rays.
